About us

We make our own USP/EP grade Nicotine entirely from scratch in India. Our nicotine is made with finest quality, high-strength tobacco sourced from the rolling plains of India's tobacco heartland, Gujarat.

A very large part of providing consistent quality is experience. Nico Orgo has been in the nicotine business since 1979! A non-stop search for excellence, and an obsession with quality has led us to a very refined manufacturing process that ensures top-quality, consistent Nicotine in every single batch.

Constant improvement has meant that we now manufacture our pharmaceutical grade Nicotine in an ISO 6 grade, WHO GMP Cleanfactory.
